

User manual

The Cureety platform provides access to the Cureety TechCare medical device, a customizable classification algorithm, which allows the configuration of follow-up questionnaires specific to the treatment and pathology of each patient being monitored.

Cureety TechCare is a Class I medical device.

This user manual is intended exclusively for patients using Cureety TechCare.

1. General information

Safety information

Use

Cureety TechCare is a software application designed to generate a classification of the clinical status of patients with chronic diseases or at risk of hospitalization, in order to facilitate remote medical monitoring of clinical signs and possible adverse events, in addition to physical consultations. Patients can read informative messages related to their clinical status, in order to self-manage their conditions and improve their quality of life.

Counter-indications

The device should not be used by patients under the age of 18.

Precautions for use

- The device should only be used by a patient with sufficient autonomy to use digital tools.
- For patients who are not technically savvy to use digital tools but still able to answer questions over the phone, the device may be used instead by a healthcare professional who reads the questions and records patients' answers over the phone.
- Healthcare professionals must be trained before using the device.
- Healthcare professionals should verify that the questions, questionnaires, and classification thresholds provided are appropriate for their healthcare practice and the patient's clinical condition. They may ask to modify these parameters to suit the patient and their own practice.
- In order to monitor clinical signs and possible adverse events, professionals should consult both the notifications and the dashboard.
- The device is not intended to be used as a diagnostic tool. In addition, the device is not a substitute for existing medical practices, regular consultations or the standard management system for medical emergencies as part of the patient's treatment.
- The device must be used with one of the following browsers: Google Chrome, Firefox, Safari, or Edge. It should not be used with Internet explorer, or any other browser, even if that browser is installed by default on your smartphone, tablet or computer.
- The application may be temporarily unavailable during maintenance periods.
- An Internet connection is required to use the device.
- Any serious incident occurring in connection with the use of the Cureety Techcare medical device should be reported to Cureety as well as the relevant authorities in your country.

General information

Use

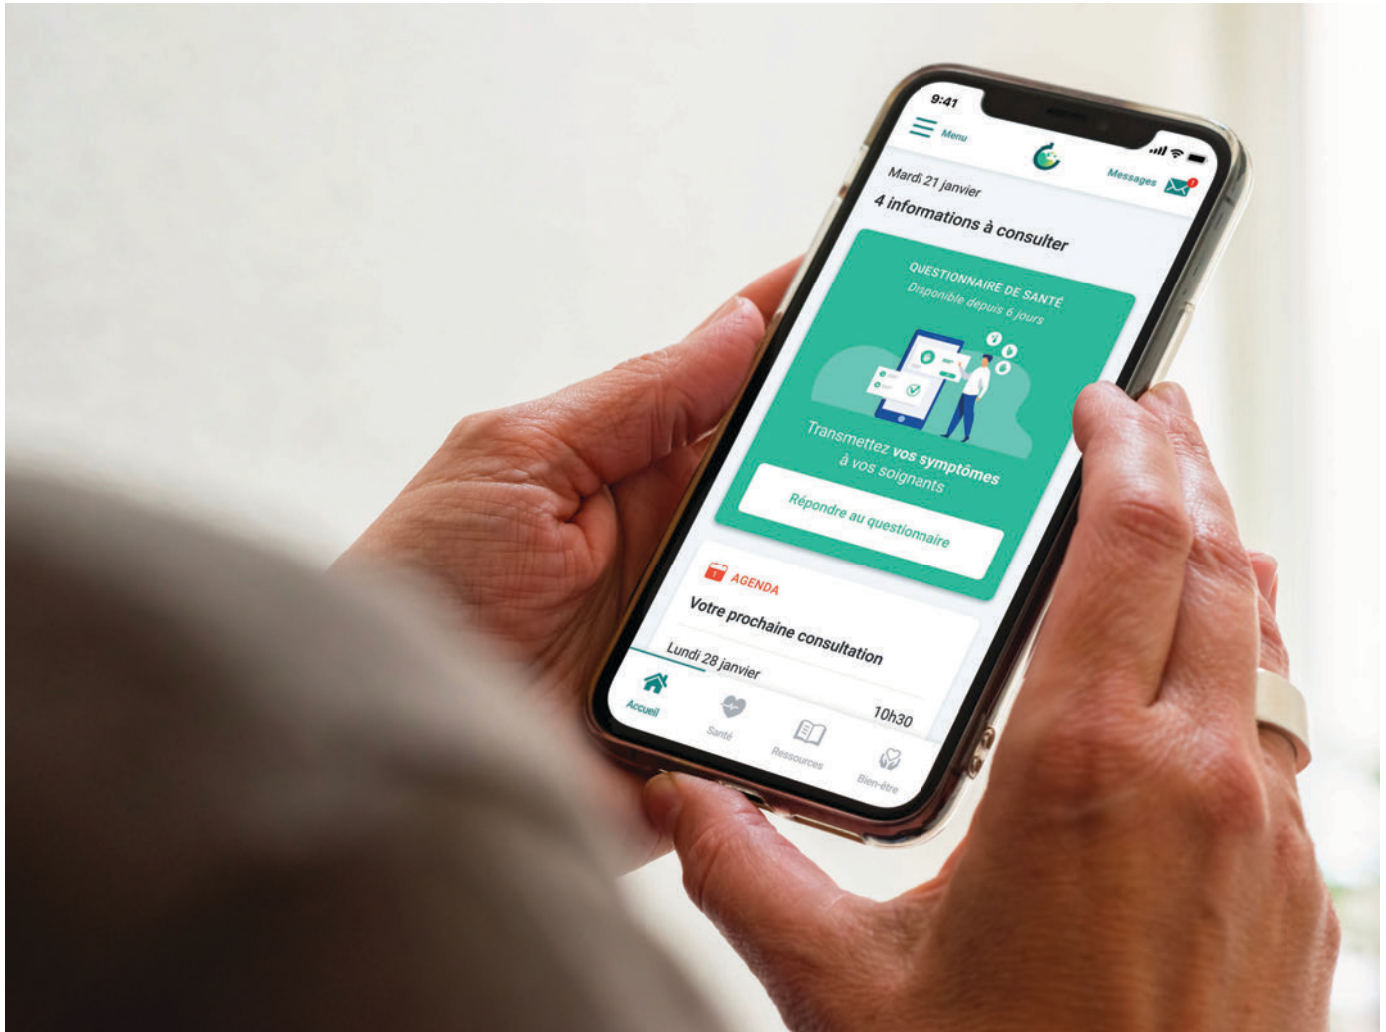

The Cureety application and the functionalities described in this user manual are exclusively intended for patients using Cureety TechCare.

The objective of the Cureety application is to facilitate the monitoring of side effects reported by cancer patients who are undergoing treatment in the patient's hospital.

The Cureety application is not a diagnostic tool, cannot replace existing medical practices, nor can it replace regular consultations or the standard system for handling medical emergencies as part of the patient's treatment.

Counter-indications

Access to the Cureety application requires the use of a computer running Windows or MacOS, an internet browser (Chrome, Safari, Edge, Firefox) and internet access. Its use does not require any particular maintenance procedure other than the normal update of the operating system and the internet browser.

What is Cureety?

Cureety offers a remote monitoring service in oncology to improve patient care and follow-up.

What is the benefit of remote monitoring?

A clinical trial conducted in the United States by Dr. Ethan Basch over a period of 10 years proved that remote monitoring, as a result of regular transmission of a questionnaire to patients, improves management for patients with cancer.

Cureety, partner of your healthcare facility

Your ally in improving your care and facilitating communication with your healthcare team

Questionnaires adapted to your treatment to share your symptoms

Quick and easy questionnaires to collect the side effects associated with your treatment and their severity. Your symptoms are sent to your healthcare team who will contact you if needed.

Tailor-made therapeutic advice on how to manage your symptoms

Following the responses to your questionnaire, personalized therapeutic advice is immediately communicated to you in order to guide you in your care and help you manage your symptoms.

Benefits of Cureety

Improve and facilitate your consultations

All the information entered into Cureety is documented in the form of reports to be presented during your consultations with your primary care physicians / GPs or in the hospital.

Benefit from supportive content and care

Cureety offers therapeutic educational content and digital support care (i.e. adapted physical activity, hypnosis, nutrition, etc.) developed by a renowned scientific committee.

Strengthen the link with the healthcare team

Cureety enables you to easily share documents with your healthcare team (i.e. test results, photos of a symptom, etc.). Your healthcare team can also submit prescriptions, blood test results, etc.

How does Cureety work?

At a frequency defined by your doctor, you will receive a notification to answer your health questionnaire

You complete your questionnaire

Your healthcare team is informed and reviews your answers

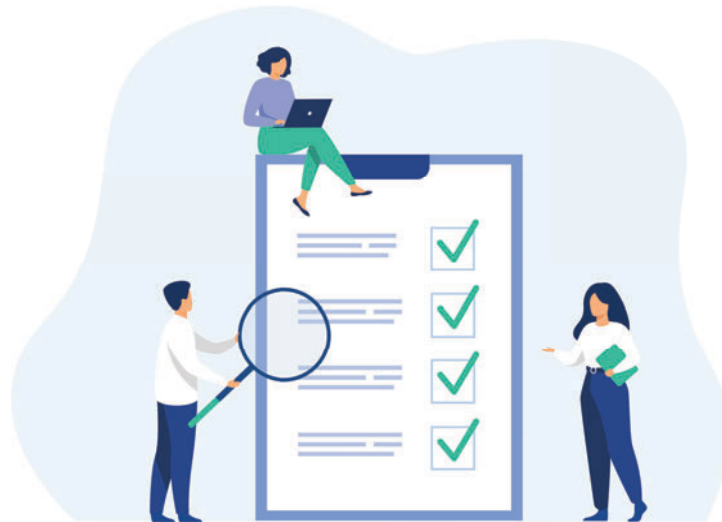

You get advice on how to manage your symptoms

To learn more, you can access medical content adapted to your care pathway (i.e. articles, videos, supportive care, etc.)

Therapeutic recommendations

After answering your health questionnaire, Cureety evaluates your health status and sends it to your healthcare team. Cureety provides you with a therapeutic recommendation that can be of two kinds:

A correct health condition

If you report one or a few minor symptoms, Cureety provides specific therapeutic messages on how to manage each symptom.

A health condition to be monitored

If you report any symptoms that need to be monitored or are deemed critical, Cureety will refer you to your healthcare team or emergency services, depending on their severity.

2. User manual

The Cureety mobile application is available on iOS (iPhone) and Android, please go to the page corresponding to your phone to access the appropriate user guide

- 1.** Register and login to Cureety p.13
- 2.** Install the application from the App Store p.14
- 3.** Get started with the application p.16

1. Register and login to Cureety

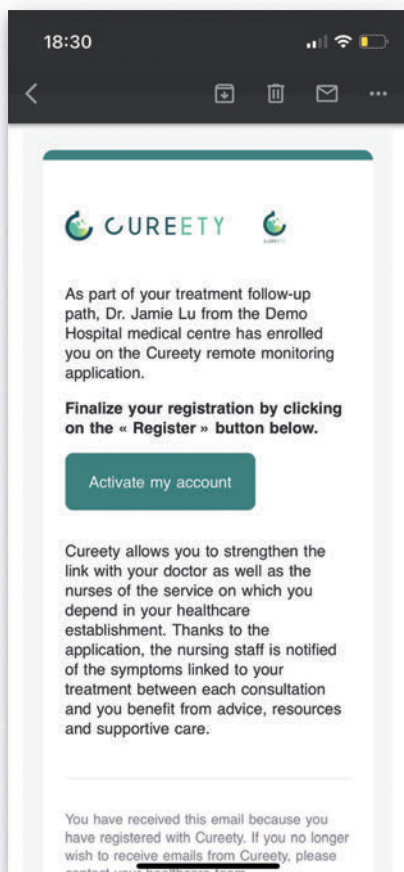

1

Your doctor registers you on the Cureety platform

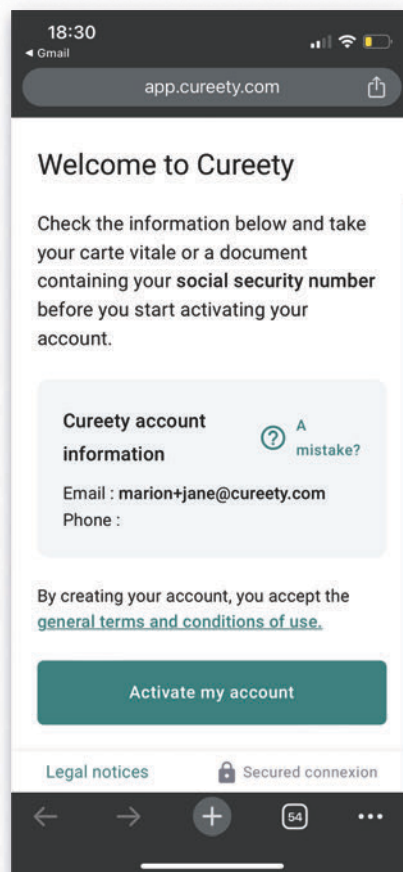

2

You receive an email and a text message: click on Activate my account

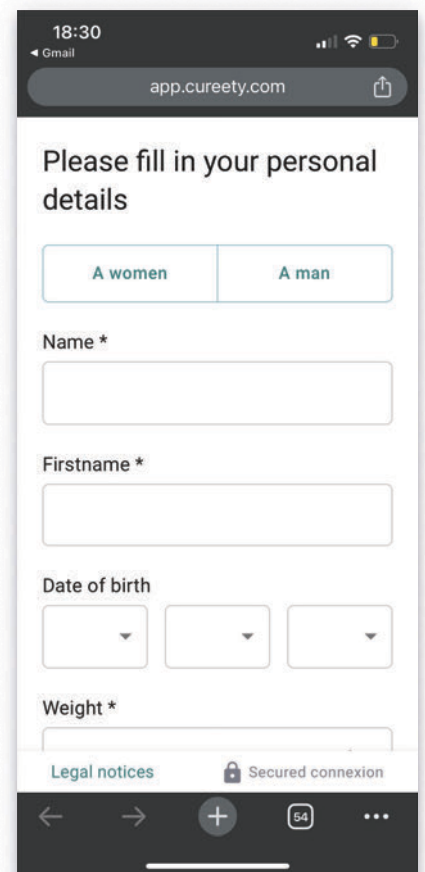

3

Check your account information and click on Activate my account

4

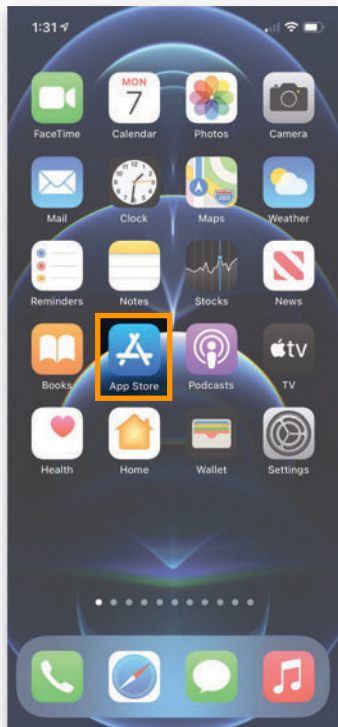

Finalize your registration by completing your personal details

2. Install the application from the App Store

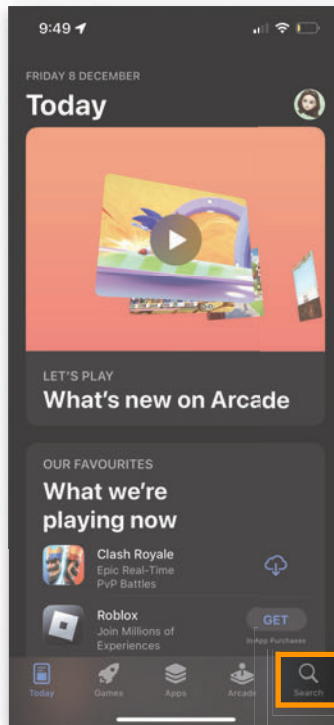

1

Click on the
the App Store icon

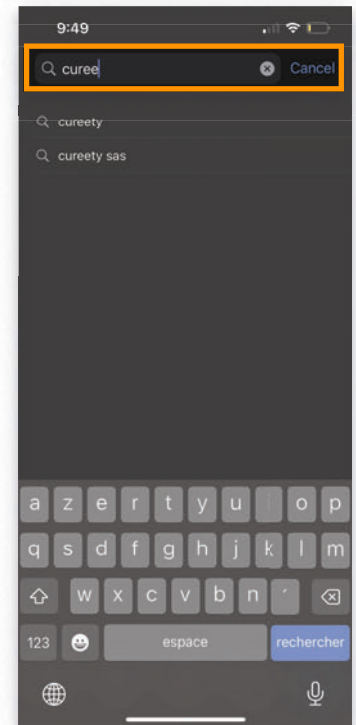

2

Click on Search

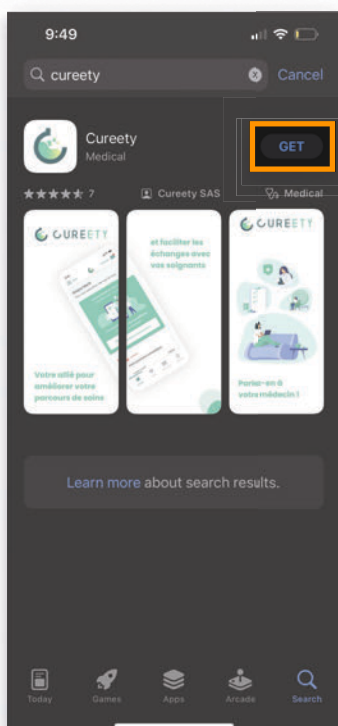

3

Type "Cureety" in
the search bar

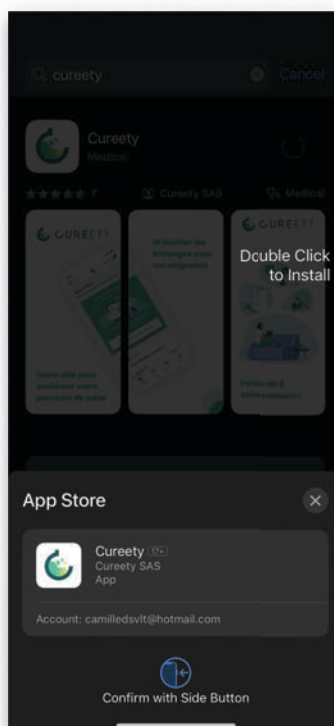

4

Click on Get

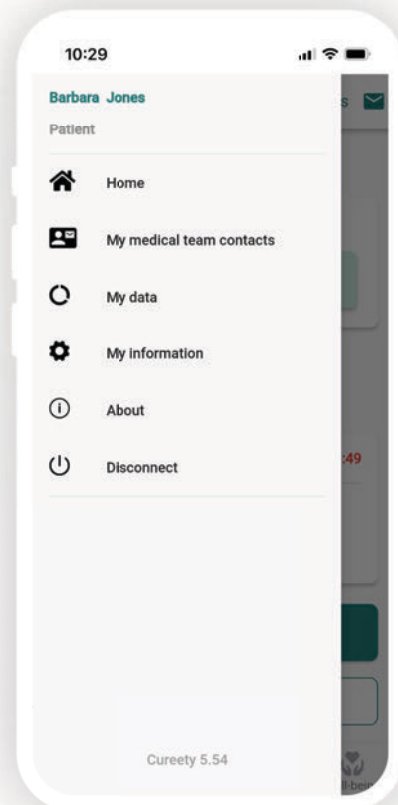

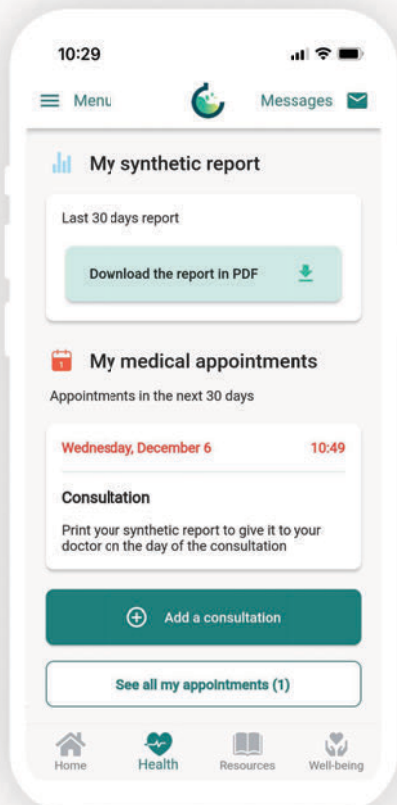

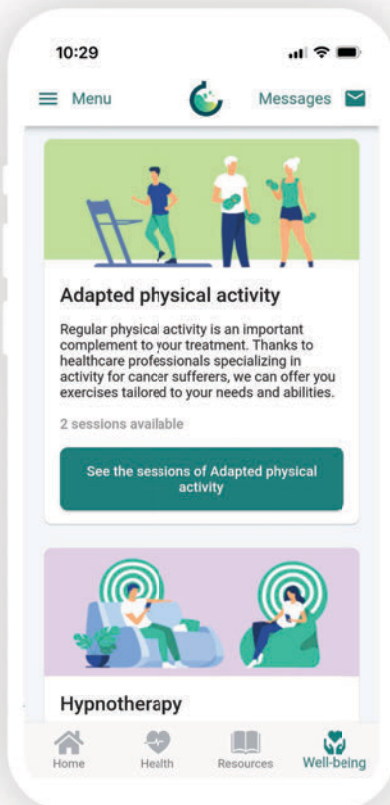

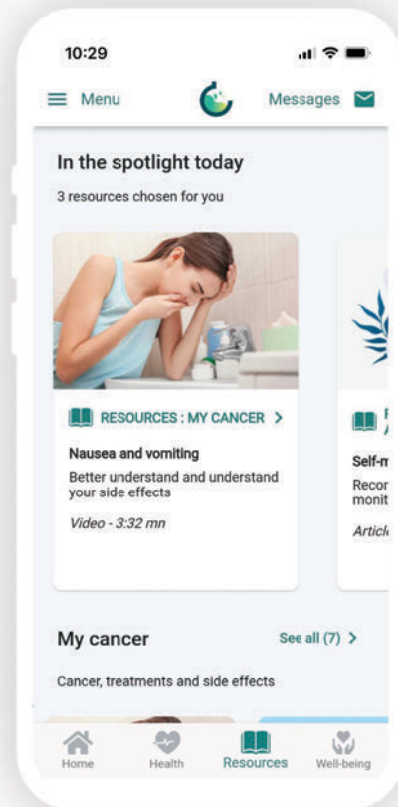

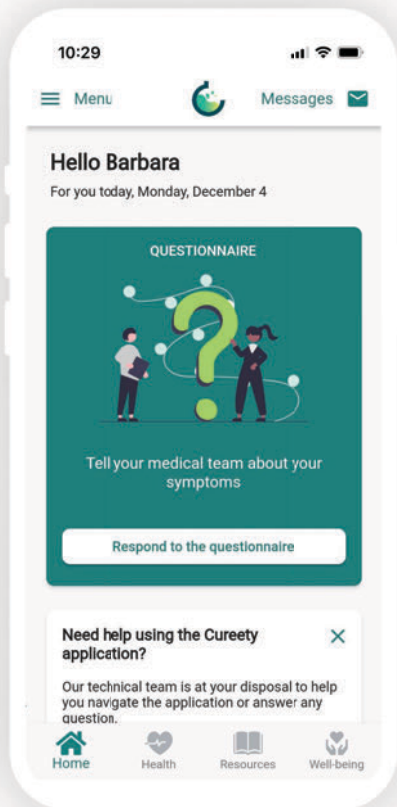

5

Confirm the installation with the side
button or the main button

Cureety mobile application

3. Get started with the application

The application has four sections

Home

Your daily news: health questionnaire, upcoming medical appointments, new messages, etc.

Health

Your medical appointments: summary report from the past month, history of symptoms and advice, and your clinical file.

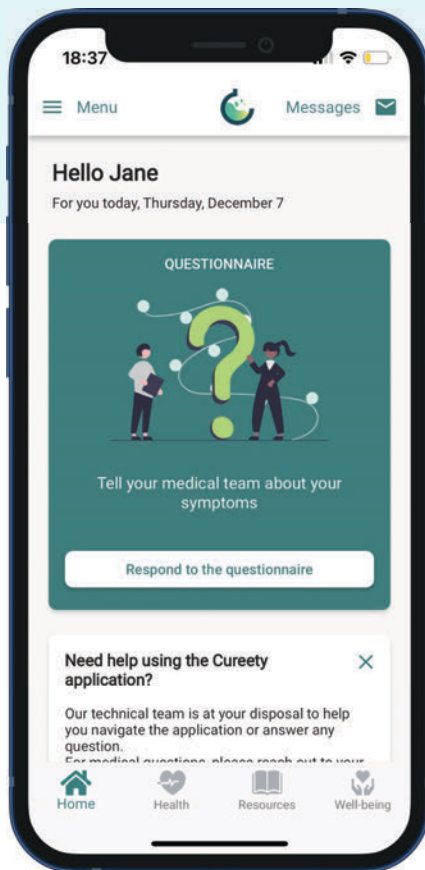

Resources

Your therapeutic resources: articles, videos and PDF files selected for you.

Well-being

Your supportive care: video or audio activity sessions such as hypnotherapy or adapted physical activity.

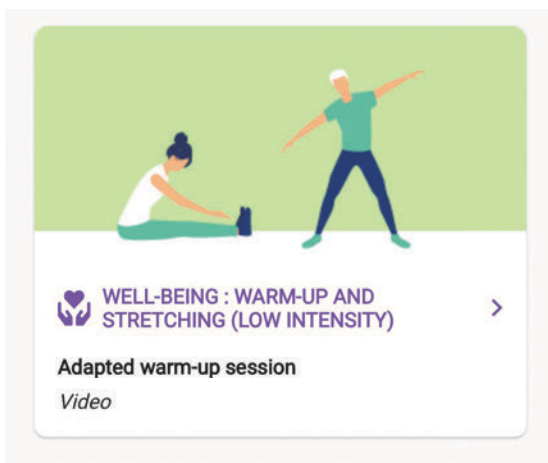

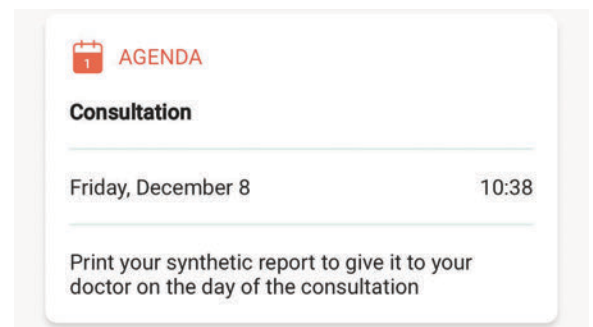

Your health questionnaire of the day

Displayed at the frequency defined by your doctor (e.g. every 7 days), this section allows you to complete your health questionnaire. Answer the questions, send your symptoms to your healthcare team and discover your personalized therapeutic advice.

If needed, the application invites you to contact your healthcare team.

Your upcoming medical appointments

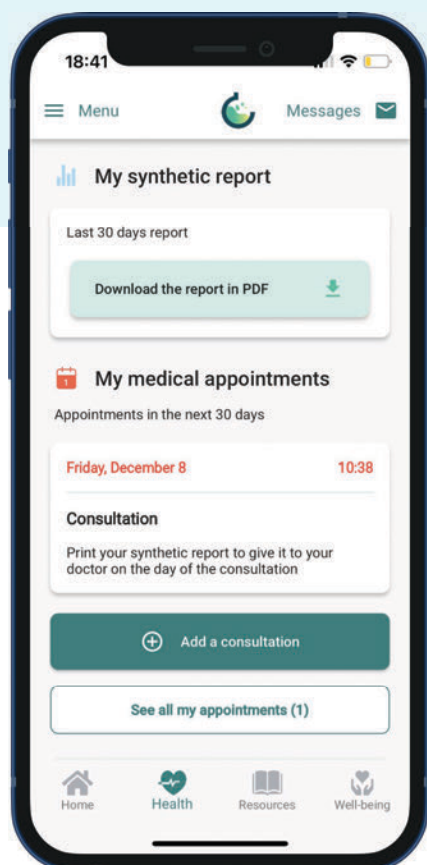

The "agenda" section remind you of the medical appointments scheduled for the upcoming days, as well as the actions expected to prepare them (for example: 'you might need to do a blood test before your chemotherapy session').

Recommended content to learn more

With each new log in, you will be offered a customized therapeutic resource and supportive care session.

Simply click on the card to discover them.

My summary report

The summary report is a PDF file that gathers all the symptoms you reported in the last 30 days. You can download or print it.

It is recommended that you bring the report with you to your consultation with your oncologist.

My therapeutic messages

Here you can find the number of symptoms you reported in your last questionnaire.

The "View my therapeutical advice" button allows you to access the history of all the advice you have received since your first use.

My medical appointments

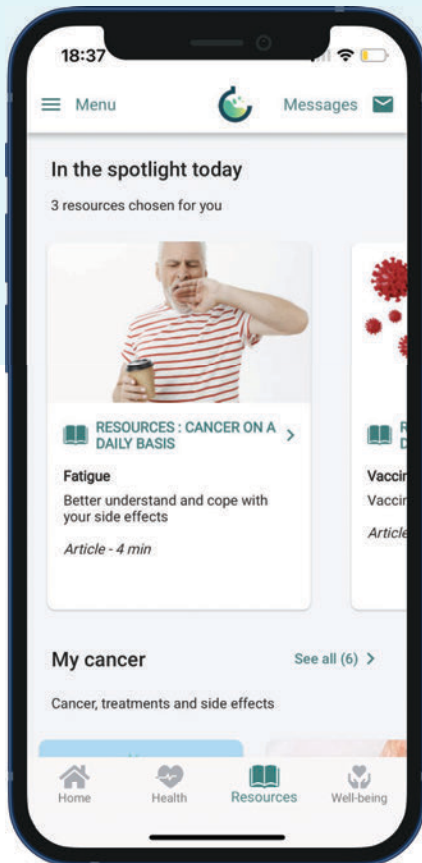

Your scheduled medical appointments for the next 30 days appear here.

Your healthcare team can create them, but the "Add a consultation" button also allows you to fill them in yourself as you go along.

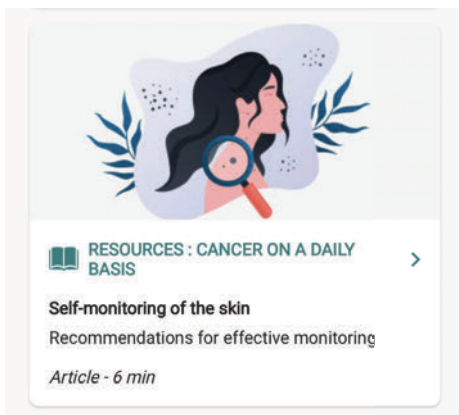

My clinical file

Your clinical file contains the documents you share with your healthcare team. You, like them, can add photos, prescriptions, lab test results, etc. at any time.

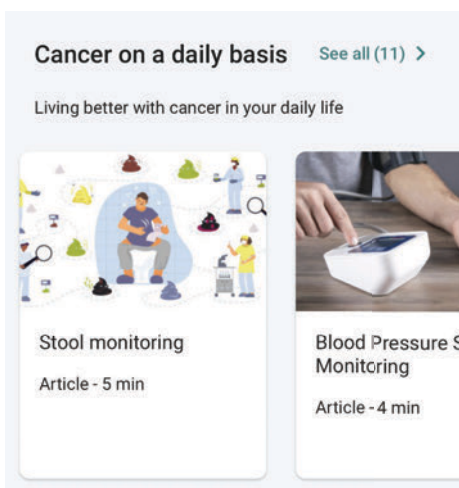

This section contains therapeutic resources to help you better understand and live with your cancer on a daily basis. They can be in the form of articles, PDF files or videos.

Today's headlines

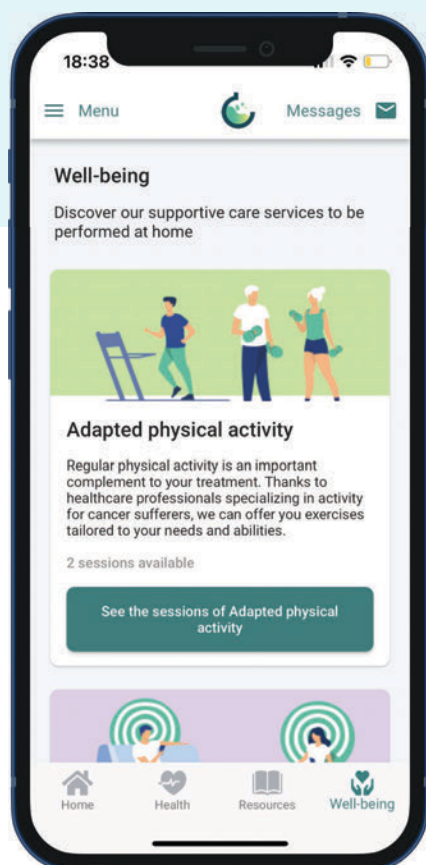

Every day, Cureety selects for you 3 resources to discover. They are highlighted at the top of the section.

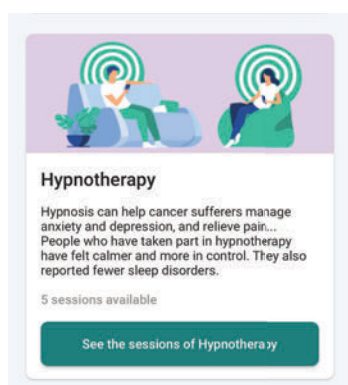

Contents and categories

All resources are organized into different categories that you can browse to find tips and information about your disease, treatment, operations, etc.

A resource that has already been viewed will be indicated by a "Already read" or "Already listened to" banner.

This section contains audio, video, or PDF sessions of supportive care to be followed at home. The supportive care that is offered to you takes into account your condition.

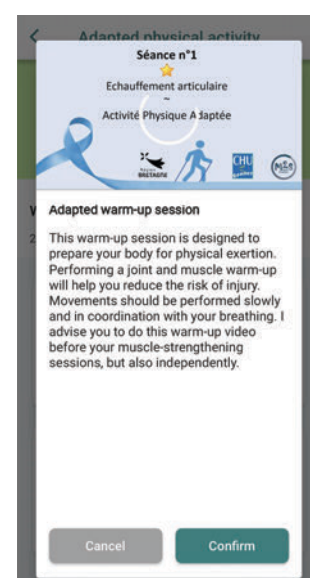

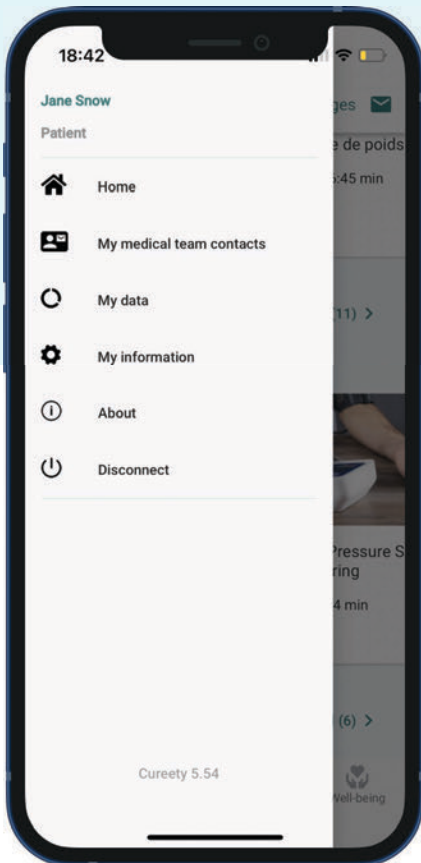

Categories and sub-categories

The sessions are organized into categories and sub-categories. At the moment, there is a "Hypnotherapy" category, accessible to all patients, and an "Adapted Physical Activity" category open to a limited number of patients.

Supportive care sessions

Each session contains a video or audio file that you can watch or listen to as many times as you like. By clicking on the "Confirm" button, you indicate that you have already completed the session and can thus follow your progress.

My medical team contacts

This section contains the contact information for your healthcare team. You can also add the other healthcare professionals in your care circle (i.e. pharmacist, nurse, laboratory, etc).

My data

You can find the clauses that you have accepted concerning the use of your health data. If you change your mind, an objection form is available to withdraw your consent.

My information

This section contains all of your personal information. For example, you can modify your weight or change the language used in the application.

About

You can track updates to the Cureety TechCare application and medical device here.

Log out

This button allows you to disconnect from the application.

How to unsubscribe from the Cureety platform

To unsubscribe from the Cureety platform, please send an email to the following address : support@cureety.com

Because Cureety TechCare is a medical device, we recommend that you discuss this with your healthcare team beforehand.

3. Frequently asked questions

What is the benefit of Cureety for my doctor?

With the regular answers to your questionnaire, your doctor can quickly get an initial idea of how you are coping with your treatment. He or she will then be able to devote more time during consultations to provide you with targeted advice for the rest of your treatment.

Is my data secure?

When you use Cureety, you are providing sensitive and personal health data. Your data is encrypted and stored securely in servers and data centers that are certified according to the strongest norms and regulations.

For patients treated in hospitals located in the European territory, the data is hosted in France by a provider certified ISO 27001 for information security management and HDS (Hébergeur de Données de Santé) for health data hosting, ensuring high standards of data protection and security.

For patients whose hospitals are outside of the European Union, Cureety complies with the local health data regulations and works with hosting providers that deliver high levels of data protection and security.

The parent company of Cureety is based in France.

How do I report a side effect that is not listed for me?

The last question of each questionnaire is open-ended (free-text). This is where you can report symptoms that are not covered by your questionnaire. If you have any symptoms that you feel are serious or urgent, please call the hospital, your doctor or the emergency services.

Cureety TechCare is a software application designed to generate a classification of the clinical status of patients with chronic diseases or at risk of hospitalization, in order to facilitate remote medical monitoring of clinical signs and possible adverse events, in addition to physical consultations. Patients can read informative messages related to their clinical status, in order to self-manage their conditions and improve their quality of life.
